

BETTER OPERATORS THROUGH BETTER DRONE TRAINING

Is Drone Training And Operator Currency A Burden?

Let the Zephyr Drone Simulator
streamline your program!

Trusted By Hundreds Of Organizations

- Texas Department of Public Safety
- Clemson University
- NASA
- US Secret Service
- Unmanned Safety Institute
- 25+ State Department of Transportations

User Friendly | Proven Learning | Direct Team Support

Realistic Training

- Most accurate flight physics system of any simulator on the market
- Skills learned translate directly to real life skills
- Covers fundamental skills through more challenging professional level skills
- Fly in difficult environments, including interiors, windy outdoors around structures, and more, learning to manage difficult situations and keep your hardware intact
- Train for system failures, modules include recoverable system failures such as signal feed loss and GPS loss
- Fly different UAS models to get used to flight “feel” and the size

Remove Training Obstructions

- No need to travel due to airspace restrictions
- Train any time, rain or shine. The sim isn't cancelled due to inclement weather
- Mitigate risk, crashing in our sim or training in high stress situations does not risk your expensive drones and payloads
- Fly anywhere with a compatible computer and internet connection, no download restrictions. Fly at home, in the office, station etc.
- Skip worrying about charging batteries or having enough drones to train multiple operators

Learning Management System & Instructor Tools

- Flights are recorded to our integrated learning management system so instructors can track scores, flight time and much more
- See where trainees/operators are struggling for faster improvements
- Create courses and assignments to ensure your operators are keeping up with currency and flight time
- Certify operators through the APSA BPERP with our software (and more in the future)
- Easily add and remove users due to staff changes through the LMS
- Direct access to our team for support and assistance

Drone Models

We currently offer 24 models of drones included in both license packages:

- DJI Phantom 3
- DJI Phantom 4
- DJI Inspire 1
- DJI Inspire 2
- DJI Mavic
- DJI Matrice 210
- DJI M30
- DJI Avata 2
- Autel X-Star
- Autel Evo II
- Skydio 2
- Skydio X2D
- Skydio X10
- Parrot Bop 2
- Parrot ANAFI USA
- 3DR Solo
- Syma X5C
- Yuneen Typhoon
- Robotic Systems Titan
- AG-6A
- Sky-Hero Loki MK2
- HD Racer
- Uniform Sierra Arrowhead
- Freely Alta X

License Packages

We currently offer 20 training scenarios:

Base Site License

- Tutorial
- Basic Training
- The Hill
- Obstacle Course
- Community Park
- Parking Lot
- Drone Racing
- The Yard
- Flight Path Practice

Complete Site License

- All Scenarios in the Base license
- NIST Training Course
- NIST Test Course
- Warehouse
- The Island
- NIST Park
- Tower Inspection
- Skip Fredricks Stadium
- Bridge Inspection
- SAR* Fundamentals
- SAR* Mountain
- Beach Front

**Search and Rescue*

Supported Controllers for Mac and Window OS:

- Xbox One Controller via wired or wireless via Bluetooth (wireless for Windows OS only)
- Playstation 4 & 5 Controllers wired only
- Fly Sky FS-i6s Controller
- DJI RC2 FPV Controller Wired
- DJI RC3 FPV Controller Wired

Recommended System Requirements:

- **OS:** Windows 11 or macOS 26 Tahoe
- **CPU:** Intel Core i7 @ 3.6 GHz or equivalent or Apple M1 or Higher
- **Memory:** 24 GB of RAM
- **Hard Drive:** 7 - 25GB*
- **Graphics:** Direct X 10 or higher compatible graphics card (GTX 970 equivalent or higher)
- **Internet Connection:** DSL or Higher

Minimum System Requirements:

- **OS:** Windows 11 or macOS 14 Sonoma
- **CPU:** Intel Core i5 @ 3.4 GHz or equivalent
- **Memory:** 16 GB of RAM
- **Hard Drive:** 7 - 25GB*
- **Graphics:** Direct X 10 or higher compatible graphics card (GTX 660 or equivalent)
- **Internet Connection:** DSL or Higher
